

At the Vascular Institute, our multidisciplinary team of vascular surgeons and vascular interventional radiologists have over 100 combined years' experience in comprehensive vascular care and are leaders in today's cutting edge minimally invasive treatments.

**Some of the many services offered at the Vascular Institute include:**

### **GENERAL**

- Venous access placement
  - PICC line
  - Midline

### **UROLOGY**

- Nephrostomy tube and Nephroureteral stent placement
- Nephrostomy tube and PCNU routine exchange
- Suprapubic tube placement
- Suprapubic tube exchange
- Renal mass consultation
- Renal mass cryoablation and microwave ablation
- Varicocele Embolization

### **NEPHROLOGY**

- Fistulogram and intervention
- Graftogram and intervention
- Tunneled dialysis catheter placement
- Temporary dialysis catheter placement

### **GI/HEPATOLOGY**

- Biliary tube and cholecystostomy tube exchange and management
- Outpatient paracentesis
- Indeterminate liver lesion consults
- US and CT guided random core and targeted lesion biopsy
- Unresectable hepatocellular carcinoma consultation and treatments
- Percutaneous microwave ablation
- Chemoembolization
- Radioembolization / Y90
- Biliary drainage and brush biopsy
- Palliative care services

### **PALLIATIVE CARE SERVICES**

- Celiac plexus neurolysis and blocks
- Stenting of malignant biliary obstruction
- Stenting of malignant GI obstruction

### **ONCOLOGY**

- Chest port insertion and management
- US guided fine needle aspiration
- CT guided lung biopsy
- Stage I lung cancer consultation and ablation therapy
- US and CT guided soft tissue biopsy
- US and CT guided bone biopsy
- Paracentesis
- Thoracentesis
- PleurX catheter placement
- Bone marrow biopsy and aspiration
- Indeterminate liver lesion consults and biopsy
- Liver dominant metastatic and primary malignancy consultation and treatment
  - Percutaneous microwave ablation
  - Chemoembolization
  - Radioembolization / Y90
- Palliative care - neurolysis and blocks
- Stenting of malignant GI obstruction
- Stenting of malignant biliary obstruction

### **VASCULAR**

#### **(PODIATRY, INTERNAL MEDICINE, WOUND CENTERS)**

- Peripheral vascular disease consultation and comprehensive care
- Free in office ABI testing
- Endovascular arterial interventions
- Venous disease consultation
- Superficial venous reflux studies
- Endovenous laser ablations
- Venogram for dialysis mapping

### **OB/GYN**

- Uterine Fibroid Embolization

### **ORTHOPEDIC**

- Kyphoplasty
